STATEMENT

I am a designer with refined taste, absolute care for detail, and deep curiosity that gives me empathy for users and their pain points. I take great pride in my ability to innovate and a creative process that results in improved user experience and performance.

EXPERIENCES

11/2019 - Now

Marketing Designer II

@ Evernote - Redwood City

- Led and developed large-scale campaigns and product launches from initiating concepts through execution, defining and expanding campaign themes across channels
- Refreshed the Evernote website serving 20MM users per month. Conceptualized and developed new design treatment that enhanced market position and improved performance
- Created instructions and guidance for designers on the usage of creative resources, and introduced naming conventions as well as localization process for assets
- Developed scalable style guides, email templates and website component libraries to maintain consistency across the brand company wide
- Supported brand storytelling across digital and print platforms, and worked closely with stakeholders to ensure branded content delivered on the brief, goals, and expectations

10/2019 - 11/2019

Senior UI/UX Designer

@ Leadvisor - San Jose

- Worked closely with the executive team, defining a vision for design that set the direction for product development
- Created wireframes for the internal communications, designed dynamic and interactive prototypes, and turned team's ideas into testable artifacts

03/2018 - 09/2019

Product Designer

@ Jyve - San Francisco

- Collaborated with product managers and engineers to solve design problems and create flexible and scalable UI and UX solutions for mobile apps
- Interviewed the target users, built the user flows for the core product platforms
- Developed wireframes, as well as highly functional and interactive prototypes, and created the necessary assets and graphic elements

05/2017 - 03/2018

Product Designer

@ Pillow - San Francisco

- Performed as a lead designer for marketing launch including banners, brochures, door hangers, email campaigns, presentation decks, iconography, and landing pages
- Worked with Engineer and Marketing team to design interaction and user interface for dashboard and responsive website
